INSPIRING INTERIORS TRANSFORMING HOMES

Avista's flooring products provide a hard-wearing, seamless surface which gives great strength and durability with fantastic design flexibility.

You can create floors to suit your every need – from that cutting edge feature floor, to unique treatments for kitchens, entertainment areas, laundries, rumpus rooms and garages.

Waterbased epoxy products provide an easy to use and durable option, while an epoxy flake floor can create a unique new look.

Avista recommends application by a professional applicator.

Top Coat: Avista Polyurethane Sealer

SOLID COLOUR

DURABLE, EASY TO USE AND ECONOMICAL

Waterbased epoxy flooring provides a durable, protective solid colour coating for your internal concrete floor. Avista's waterbased epoxy system is low-odour, quick-drying and provides a hard-wearing, low-sheen finish which can be tinted to a range of practical colours. It is an easy to use two-part system where Part A and Part B are mixed in equal quantities.

Avista's waterbased epoxy products are ideal for your garage floor or rumpus room and can also be used for light commercial floors.

Finish: Avista Solid Colour
Colour: Avista Trunk Grey in Avista Waterbased Epoxy Resin
Top Coat: Avista 2 Pack Urethane Sealer (optional)

Colour: Avista Silver Grey
in Avista Waterbased Epoxy Resin

WATERBASED EPOXY STIPPLED STONE LOOK

For an alternative to a solid floor colour or decorative flake flooring, try Avista's Waterbased Epoxy Stippled Stone look. This can be achieved using the tinted Waterbased Epoxy for the base, and also for the stippled effect, which is applied by a professional applicator using a hopper gun.

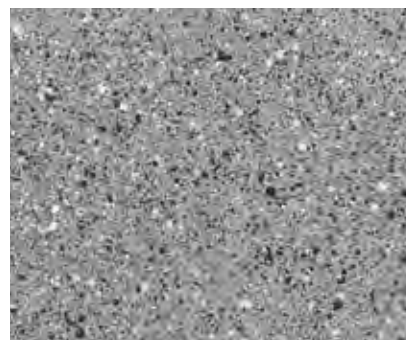

For a hard wearing, scratch resistant, high build finish, add Avista's 2 Pack Urethane as the top coat.

Finish: Avista Stippled Stone
Base Colour: Avista Trunk Grey in Avista Waterbased Epoxy Resin
Fleck Colours: Avista Black & Avista White
Top Coat: Avista 2 Pack Urethane Sealer (optional)

Finish: Avista Stippled Stone

Waterbased Colour Tint 400ml Range

The Avista Waterbased Colour Tint 400ml range can be found on shelf in your local stockist.

Avista Waterbased Colour Tints change colour once mixed with Avista Waterbased Epoxy due to its white base. The images below show the tint colours after being mixed with Avista Waterbased Epoxy.

BLACK

WHITE

BRIGHT YELLOW

BRIGHT RED

BRIGHT GREEN

BRIGHT BLUE

SILVER GREY

Dulux® Colour Tints

The Avista Waterbased Epoxy Part A can be tinted using any Dulux® colour tint with a white base, however, due to the white base the resulting colour will always be a few shades lighter than it appears on a Dulux® colour card or Dulux® colour chip/sample.

Note: Colours represented are indicative only. For solid colour, a third coat may be required. When using white/light colours as a base coat for flakes, a third coat may also be required for better opacity.

DECORATIVE FLAKE FLOORING

SOPHISTICATED TRANSFORMATIONS

Create your own designer look with a hard wearing epoxy floor coating incorporating Avista decorative flakes. A decorative flake floor provides a great alternative to other types of floor coatings and allows you to create your own look. It is a durable seamless finish for internal concrete floors and can be used for both domestic and commercial applications.

Finish: Avista Flake Flooring

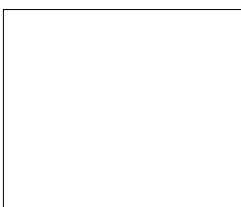

Base Colour: Avista Grey (1L) in Avista Epoxy Resin

Flakes: Avista Made To Order

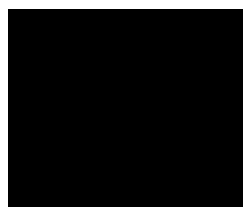

Top Coat: Avista Polyurethane Sealer

EPOXY RESIN BASE COAT COLOURS

The Avista epoxy resin base coat tints are designed to be used with the 10L Epoxy Resin Kit. These tints cannot be used with the Avista Waterbased Epoxy Resin (refer to page 6 for waterbased colour tints).

Flakes: Avista Made To Order
Top Coat: Avista Polyurethane Sealer

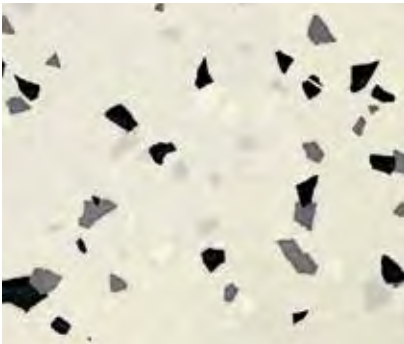

TERRAZZO LOOK

What is terrazzo?

Terrazzo is a flooring material consisting of chips of marble or granite set in concrete and polished to give a smooth surface. A similar look can be achieved with a partial flake application at a fraction of the cost.

Many different terrazzo looks can be achieved by choosing different base colours to combine with various flake blends.

Colours shown in this brochure are intended as a guide only. Colours may vary from batch to batch. Variations in colour and shading may also occur depending on the job conditions, chosen texture and finishing practices employed by your concrete contractor.

POLISHED CONCRETE

To achieve a sophisticated polished concrete finish, it is possible to grind and seal a concrete floor surface. This is done mechanically by a professional with a concrete grinder, until the surface is ground back to achieve the desired result. Avista offers various sealers that can be used as a top coat to provide a gloss finish.

Image is a representation of the types of projects that these products can be used for.

Avista Waterbased Sealer

A semi gloss, low odour sealer designed to give a more natural look.

Avista 2 Pack Urethane Sealer

A two pack sealer with good wear and chemical resistance, with a high gloss appearance.

Avista Polyurethane Sealer

A high gloss, high abrasion resistant, high build coating, for a high performance finish in high traffic areas.
